

# TECHNICAL DATA

## Eldorado CT-2400 Carbon Remover & Paint Stripper

### Description

Eldorado CT-2400 is a two-phase, cold-solvent, tank-type chlorinated carbon remover and paint stripper. It is particularly recommended for use on engine parts to remove baked-on soils, especially on reciprocating engines.

### Material Properties

- Safe on all metals and will not embrittle high-strength steel
- Rapidly removes soils, carbon, and paint films
- Requires no heat and long lasting
- Nonflammable and low vapor toxicity
- Free rinsing
- Approved by or conforms to: MIL-C-19853, Type I Class II, AMS 1378, Rolls-Royce

### Application Techniques

CT-2400 is used as received in a mild steel tank at room temperature. CT-2400 contains two layers as packaged in the drums; the top layer forming a liquid seal to prevent evaporation of active solvents in the carbon and paint-removing layer below. If a portion of a drum is to be used, agitate contents thoroughly before pouring and allow mixture to separate before use. Immerse parts completely in lower layer and allow remaining for 30 minutes or more, as required, for soil removal. Rinse with pressure spray, steam, or petroleum solvent. Do not allow parts being processed to extend into water seal layer. Avoid heavy contamination of oils and greases to increase the tank life. Precleaning of parts with an alkaline cleaner may prove economical in high-production situations. Monitor sludge formation to prevent soil redeposition. Maintain upper layer at a depth of 2 inches per foot of depth of lower layer by additions of water. Seal ratios may be determined through the use of a glass sight tube.

### Health Precautions

This product is safe to use and apply when recommended precautions are followed. Before using this product, read and understand the Material Safety Data Sheet (MSDS), which provides information on health, physical and environmental hazards, handling precautions and first aid recommendations. An MSDS is available on request. Avoid overexposure. Obtain medical care in case of extreme overexposure.

**For industrial use only. Keep away from children.**
