

TECHNICAL DATA

Eldorado ESOL-146 VOC Exempt Wipe Solvent Blend

Description

Eldorado ESOL-146 incorporates the VOC exempt solvent, Tert Butyl Acetate into a solvent mixture for use as a cleaning solvent in aircraft prepaint activities and prior to application of adhesives. The slower evaporating TBA improves the blend's performance on more difficult soils such as greases, while retaining rapid evaporation compared to aliphatic blends. The TBA ester shows excellent performance on partially cured polysulfides.

Material Properties

- Ester reduces odor complaints of higher percentage ketone blends
- Evaporates completely, very low non-volatile matter
- VOC Exempt per Federal regulations

Application Techniques

To clean the surface, apply with an ESOL-146 saturated cheesecloth or lint free rag, allow time for soil penetration, and wipe dry with a clean cloth. The product evaporates fast enough to permit using a "two handed" approach to wipe solvent application and removal. Failure to wipe off all ESOL-146 residues may cause soils to redeposit and contribute to formation of swirl marks.

Use with adequate ventilation. ESOL-146 is a flammable liquid, store and use away from oxidizers, open flame, and ignition sources. It is an absorption hazard, use proper gloves when applying material and avoid extended and repeated skin contact. Keep tightly sealed when not in use.

Health Precautions

This product is safe to use and apply when recommended precautions are followed. Before using this product, read and understand the Material Safety Data Sheet (MSDS), which provides information on health, physical and environmental hazards, handling precautions and first aid recommendations. An MSDS is available on request. Avoid overexposure. Obtain medical care in case of extreme overexposure.

For industrial use only. Keep away from children.
