

TECHNICAL DATA

Eldorado PR-3135 Alkaline Topcoat/Intermediate Coat Remover

Description

Eldorado PR-3135 is a mild alkaline paint remover, specifically designed for use with selectively strippable paint schemes, particularly those employing the PPG Aerospace F565-4010 Intermediate coat. It is formulated to eliminate potential softening of base primers once the intermediate coat has been emulsified. The selection of materials in the formulation are designed for lowest potential personnel exposure to industrial chemicals, while insuring effective removal of the topcoat and intermediate coat.

Material Properties

- Very low, unobjectionable odor in use
- Safe on all metals, non embrittling
- No HAPS in formulation
- Sprays well and clings readily to vertical surfaces
- Freely rinsing with water and emulsifiable with alcohol
- Flashpoint above 200°F (93.3°C)
- Less than 315 grams per liter VOC

Application Techniques

PR-3135 has been designed for use with a selectively strippable system, and thus will show poor performance as a standard paint remover where the objective is removal of the primer, as well as the topcoat. PR 3135 is applied by spray or brush methods. Allow to dwell on surface from 2-6 hours, then remove debonded topcoat with squeegees. Reapply, if necessary, around rivet heads and other problematic areas. Rinse emulsified intermediate coat with water. Prepare the surface for recoating by following PPG recommendations in the application guide for Selectively Strippable coatings.

Although a mild paint remover, PR-3135 still requires the use of PPE, including the use of chemically resistant clothing, eye protection and a respirator.

Health Precautions

This product is safe to use and apply when recommended precautions are followed. Before using this product, read and understand the Material Safety Data Sheet (MSDS), which provides information on health, physical and environmental hazards, handling precautions and first aid recommendations. An MSDS is available on request. Avoid overexposure. Obtain medical care in case of extreme overexposure.

For industrial use only. Keep away from children.
